PROFESSIONAL SUMMARY

AI Engineer with **5 years** of experience across **GenAI, data engineering, cloud analytics**, and **enterprise system integration** with **Office 365 copilot**. Skilled in building production-grade AI applications, RAG pipelines, data workflows, reporting platforms, and model-monitoring solutions with a strong focus on reliability, scalability, and business impact.

PROFESSIONAL EXPERIENCE

Korelrise AI, Melbourne, Victora
Gen-AI engineer **(**June 2025 – Present)

- Designed and delivered a production OCR and object-categorization service using Azure AI Foundry and GPT-4o mini, processing approximately 1,000 requests per day.
- Orchestrated and implemented copilot office 365 Agent for Floral Image Franchising Pty Ltd for training, reporting and day to day operations using copilot chat-based integrations.
- Built a multi-agent RAG workflow for 100+ daily users across an enterprise design-data estate of approximately 1 PB, integrating retrieval, context assembly and downstream systems.
- Implemented MLflow experiment tracking, model registry and production monitoring covering data quality, operational KPIs and drift indicators for Finetunned models and forecast pipelines.
- RAG design with Microsoft 365 copilot agent builder and N8N for chat and system integrations.

Opal ANZ, Melbourne, Victoria
Data Analyst – Work-Integrated Learning, **(**March 2025 – June 2025)

- Developed and supported Snowflake-based reporting and data pipeline solutions used by 100+ business stakeholders for operational and analytical insights.
- Designed and implemented ETL/ELT workflows using Matillion ETL and Snowflake, including data transformation, validation, and reporting-layer preparation.
- Worked with SAP BW data extraction to support enterprise data integration and downstream reporting requirements.
- Created and optimized SQL queries, views, and transformation logic to improve data accuracy, consistency, and report reliability.

Preflet, Lisbon, Portugal (remote)
Data Engineer **(**January 2023 – June 2024)

- Proposed and implemented a forecasting pipeline in azure Databricks with error rate of less than 4%.
- Created a data streaming platform with an overall improvement of 15% in performance over the previous solution.
- Developed analysis of urban greenery analysis using satellite image segmentation.
- Fine-tuned open-source LLMs (LoRA/QLoRA) for a domain-specific energy insights assistant; tracked experiments with MLflow.

Tata Consultancy Services, Noida, India
Assistant Software Engineer **(**May 2021 – January 2023)

- Developed a data pipeline for data streaming between SAP S4 HANA, STIBO with daily reporting for material creation, handling more than 1M IDOCs generation in each run.
- Supported SQL-based reporting, data validation, and issue resolution for enterprise integration workflows, ensuring accurate downstream reporting and business continuity.
- Received customer appreciation from Walgreens for resolving critical issues in November 2022.

EDUCATION

Deakin University July 2023 – June 2025
Master of Data Science **WAM: 81.12**
Units: Data Engineering, data wrangling, machine learning, statistics, professional practices in ICT, Deep learning, CI/CD

CERTIFICATIONS

- **Microsoft Certified: Azure AI Fundamentals (AI-900) (September 2025)**
- **Presented AI chatbot app (Moola) at IBM hack (November 2024)**
